三、 样题参考

单选题

**Directions:** In this section, there are four choices for each statement. Select ONE to complete the statement or answer the question.

Which of the following verbs cannot be used to weaken a claim?

A. confirm                      B. estimate                      C. speculate                      D. suggest

(Key: A)

判断题

**Directions:** In this section, there are \*\*\* statements about academic paper writing. Decide whether it is TRUE or FALSE for each statement. Then write T for TRUE and F for False on the Answer Sheet.

\_\_\_\_\_ Some citing verbs do not indicate any value judgment on the part of the writer. They are called “strong” citing verbs.

(Key: F)

排序题

**Directions:** Arrange the following sentences in the right order for an abstract.

A. Through analyses of variance and mixed-effects modelling, the current study shows that the learning trajectory of the participants in the VE showed a larger acceleration than that of those in the traditional learning context, which suggests that simulated embodied experience in the VE may have aided in the processing of a second language, especially with regard to enhancing the learning trajectory in short-term second language training.

B. Two contexts [virtual environment (VE) vs. traditional learning environment] were compared and examined from cognitive and linguistic perspectives.

- C. The purpose of the current study was to investigate how different learning contexts can impact the learning of Mandarin Chinese as a second language.
- D. The participants' behavioural performances with regard to accuracy, reaction time, and exposure were collected and analysed.
- E. Thirty-one monolingual English speakers participated in a training study consisting of seven learning and testing sessions, followed by one additional sessions of delayed post-testing.

(Key: CBEDA)

### 配对题

**Directions:** The following sentences are all taken from method sections of different research articles. Match the information elements below with each sentence. Write down the corresponding LETTERS only.

- A. Subjects
  - B. Research location
  - C. Materials
  - D. Overview of the research
  - E. Procedure
  - F. Data treatment
1. In total, 252 students were selected for the research. The average age of the participants was 21.32 (SD = 4.5) years. The GPA of these students last semester was 72 (SD = 10.63; range = 56-98 points).
  2. To observe how participants permanganate oxidizes hydrogen peroxide to produce oxygen, the following chemical substances, devices, and tools were obtained.
  3. This study aims to investigate Macao tertiary students' attitudes towards main languages in Macao (i.e., Cantonese, Putonghua, Portuguese, and English).

(Key: ACD)

### 翻译题

**Directions:** Fill in the blanks according to the Chinese information given.

To be precise, a literature review serves to \_\_\_\_\_ (把当前研究放置在相关文献中) and to provide context for the reader.

(Reference: situate the current study within the body of the relevant literature)

### 句子改写题

**Directions:** Rewrite the following sentences to make them more academic in style. Write your answers on the Answer Sheet.

We did a really thorough analysis of the data by using this method.

(Reference: The methodology employed in this study allowed for a comprehensive analysis of the data.)
